PROJECTS

SympAI — AI-Powered Symptom Checker 🔗

- Engineered an AI-assisted symptom checker using React, Node.js, and HuggingFace/BERT, processing user inputs in under 1.5 seconds with high prediction consistency.
- Enabled text/voice symptom extraction and secured access with Firebase Authentication, improving user interaction efficiency for 100+ test cases during evaluation.

Eunoia — Personal Mental Wellness Web App 🔗

- Developed a full-stack Django platform for journaling, sentiment analysis (NLTK VADER), and mood prediction using Ridge Regression on 500+ generated mood entries.
- Integrated Plotly analytics for interactive mood timelines and implemented persistent data storage via Django ORM with optional Firestore sync to reduce data retrieval time by 30–40%.

Car Pooling - Application 🔗

- Built a city-scale ride-sharing system with Google Maps routing, dynamic pickup-point generation, and real-time trip updates for 20+ simulated routes.
- Integrated Firebase live chat, UPI payments, notifications, and Recharts-based analytics, increasing system responsiveness and communication reliability across multiple user roles (driver/passenger).

SKILLS

TECHNICAL SKILLS

Programming: Python

Machine Learning: Regression Models, Classification Models, Data Preprocessing
